EMF Balancing Technique®

Evolutionary Practice for Strengthening Intuition and Managing Personal Energy

EMF Balancing Technique®

Co-create Your Most Enlightened Life!

What is the Universal Calibration Lattice?

Each human being is surrounded by an electromagnetic field organized into a system consisting of fibers of light and energy. This system is called Universal Calibration Lattice (UCL) and it serves as our connection to an unlimited source of Universal energy. When the lattice is activated, strengthened & balanced it serves as our personal energetic “transformer” which enables us to receive and process multidimensional (intuitive) information and better manage our personal energy.

What is the EMF (Electromagnetic Field) Balancing Technique®?

It is an energy balancing system that works specifically with the UCL. It is designed to accelerate the integration of Spirit and biology for achieving personal empowerment and abundance. While the basic pattern of the UCL is universal, everyone's calibration is determined by the individual frequency of their own vibrations, making each EMF Balancing Technique® experience unique in sensation and impact.

The Phases of the EMF Balancing Technique® can be given in individual one-hour sessions or combinations. Through balance, the innate ability of individual's mental, emotional and physical bodies to operate at their natural healthy level is activated and maintained.

Why experience a session?

There are many reasons to experience a session: whether you want relaxation, clarity and profound peace or to feel balanced and grounded, you will come to understand your connection with the unlimited energy around you and will begin to experience more of your own energy — the essence of who You really are.

Left & Cover. The UCL is made up of long informational fibers, located 12–24 inches away from our physical body; a central core that runs through our body and infinity loops, connecting energy centers (chakras) to other parts of the UCL. 24 inches above the crown and 24 inches beneath our feet infinity loops connect into 2 large energy centers: Center Above (CA) and Center Below (CB).

The first four phases of EMF Balancing Technique® create an energetic foundation, empowering you to consciously “co-create the most enlightened life you can”. The focus of these phases is on releasing blockages and strengthening and balancing of the UCL. In each phase energetic templates holding specific resonance are set in order to support the alignments of the session.
